## **DETAILED ACTION**

### ***Specification***

1. The disclosure is objected to because of the following informalities:
  - a. On page 11, line 4 "that" should be "than".
  - b. On page 12, line 12 "hold" should be "holds".

Appropriate correction is required.

(The amendments to the specification filed 11/09/09 were not entered because they were not proper. Under current rules, amendments to the specification must be made by stipulating which paragraph the correction occurs in (i.e. "in the paragraph beginning on page 11, line 4" and reprinting the entire paragraph with additions underlined and deletions bracketed. Because the amendments to the specification were not entered, the objections remain.)

### ***Conclusion***

2. This application is in condition for allowance except for the following formal matters:
  - a. In claim 2, "comprising" should be "comprises" for correct grammar.
  - b. Claim 12 appears reversed (the locking pin does not move to the release position after the engagement means has disengaged the locking pin and moved towards the shaft; rather, the locking pin moves to the release position before the engagement means moves toward the shaft).
  - c. In claim 31, line 2 "locked pin" should be "locking pin".

d. Also, claim 31 is not accurate to the embodiment of the independent claim 1 (i.e., claim 1, in reciting bias means influencing the second element away from the first element, is specific to Figure 1, but Figure 1 is not manually releasable as required by claim 31).

e. In claim 32, line 4 "means" should follow "connecting" (it should not have been deleted).

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
